Cartridge Filters

SDCC-L - Cartridge filter unit

Dust collector type SDCC-L is a compressed air cleaned cartridge filter for continuous filtration of fine dust. The collector is not suitable for filtration of voluminous dust such as from wood, paper and textile. The circular gas inlet and outlet, can be swiveled to an optional position as the filter consists of several reciprocally adjustable parts. Compressed air requirement: max 2 l/s, 4,5 bar, free of oil and water. Maximum gas temperature: +60° C. The collector is not suitable for filtration of voluminous dust such as from wood, paper and textile. The circular gas inlet and outlet, can be swiveled to an optional position as the filter consists of several reciprocally adjustable parts. The separator is designed as an under pressure filter and can be located indoors or outdoors, if it is placed with protection from the weather.

Filter cleaning

The dust laden air is filtered through filter cartridges, where the dust sticks to the outside. The filter cartridges are cleaned with short bursts of compressed air. Cleaning of the cartridges is done
